DRIVE EV
100% Electric Vehicles

Drive EV Battery & High Voltage System Warranty

What is covered?

The warranty covers the battery pack and high voltage system for the life of the vehicle or 100,000km, whichever comes first. It covers the battery pack and high voltage system, including the battery pack, high voltage cables, and the high voltage system control unit. The warranty does not cover the battery pack or high voltage system if the vehicle has been involved in a collision, fire, flood, or other event that could damage the battery pack or high voltage system. The warranty also does not cover the battery pack or high voltage system if the vehicle has been used for commercial purposes, or if the vehicle has been modified in any way that could affect the battery pack or high voltage system. The warranty is void if the vehicle is not used as a private passenger vehicle.
